FOREWORD

Hon'ble Prime Minister Shri Narendra Modi ji's vision for Digital India has democratized technology, creating unprecedented opportunities for all citizens, especially women.

His unwavering commitment to women's safety is exemplified in the Digital Personal Data Protection Act, 2023 (DPDP Act), which prioritizes women's concerns - marking a historic shift with the first-ever replacement of "he/his" with "she/her" in Indian legal terminology to refer to all genders.

The world today faces the critical challenge of safeguarding its citizens in an increasingly complex digital landscape. India's pragmatic approach balances essential regulation with innovation, focusing on techno-legal solutions that protect users while fostering digital growth.

This book will serve as a crucial resource in educating and empowering women. It will enable them to understand their rights and the legal frameworks available to combat cybercrimes. It will also aid in preventing and responding to cyber threats effectively, thereby contributing to a more resilient digital society.

Congratulations to the National Commission for Women (NCW) on publishing this comprehensive Cyber Law Guide.

Ashwini Vaishnaw

Minister of Railways, Information & Broadcasting and
Electronics & Information Technology
Government of India

NATIONAL COMMISSION FOR WOMEN

FOREWORD

I acknowledge the transformative impact of digital technology on our society, presenting unparalleled opportunity while also posing serious cybersecurity risks. In an era where digital transactions, online communication, and artificial intelligence are integral to daily life, safeguarding our cyber ecosystem is not just a necessity but a national priority. Our legal framework must evolve dynamically to protect both digital infrastructure and individual rights from emerging threats.

The rapidly evolving cyber threat landscape, including deepfake technology, misinformation campaigns, financial fraud, and data breaches, necessitates continuous legal reforms. It is imperative that we develop stringent regulatory mechanisms to curb the misuse of digital platforms, prevent cyber exploitation, and counter disinformation that threatens national security and social harmony.

This book provides a comprehensive exploration of cybersecurity challenges and the legal responses necessary to counter emerging threats. As technology advances, our legal system must adapt proactively to ensure a secure digital environment. As the Bharat is leaping forward to become Developed Nation by 2047 the govt under the dynamic leadership of prime minister Shri Narendra Modi ji, taking all the necessary step sensetively deal with cyber squireties and other aspect of digital world.

I commend the National Commission for Women for its significant contribution to this crucial discourse. By engaging with this work, policymakers, legal professionals, and the public can gain valuable insights into cybersecurity laws and their societal impact. I encourage everyone to actively participate in strengthening our legal and institutional frameworks to create a safer and more resilient digital environment.

Arjun Ram Meghwal,
MoS (IC) of Law and Justice,
Government of India

FOREWORD

This book aims to serve as a comprehensive guide to cybercrimes and the legal recourses available in India to address them. It explores various forms of online abuse, including harassment, identity theft, cyberstalking, and privacy violations, with a particular focus on gender-based cybercrimes. Additionally, the book delves into the relevant provisions under Indian laws, such as the Information Technology Act, 2000 offering practical insights on how victims can seek justice. By raising awareness and highlighting legal protections, this guide seeks to empower individuals to navigate the digital landscape more safely and confidently.

Smt Vijaya Rahatkar

Chairperson,
National Commission for Women

NATIONAL COMMISSION FOR WOMEN

A. INTRODUCTION

1. In the age of Information Technology, computers have touched every facet of our lives today, transforming how we govern our life and communicate with the world around us. Today, it may be hard to imagine a world where we do not have computers as they have become essential to how we communicate with the world around us.
2. The expanding digital landscape across the world and in India as well, has created new opportunities. However, it has also introduced significant challenges, particularly in safeguarding individuals—especially women—from cybercrimes, online harassment, and privacy violations. As more aspects of daily life shift online, issues such as cyberstalking, identity theft, doxxing, and non-consensual sharing of private information have become more prevalent.
3. Cybercrimes against women involve the misuse of digital platforms to harass, threaten, or exploit women. These crimes often target their privacy, dignity, and emotional well-being. The increasing use of social media, messaging apps, and online platforms has made women more vulnerable to such offenses.
4. Cybercrimes disproportionately impact women, as women are increasingly vulnerable to online abuse such as harassment, stalking, doxxing (the non-consensual publication of personal information), and revenge porn. As per the latest data by the National Crime Records Bureau, Cyber Crimes against Women have increased by 11% in the year 2022.

Category	2021	2022
Sexually explicit material published/ transmitted	1896	2251
Other forms of cybercrimes (blackmail, defamation, etc.)	701	689

5. Cyber Crimes against Women have detrimental effect on women's wellbeing, their psychological and mental health & their dignity. The constant fear of safety, loss of reputation adversely affects them. The forms, nature and manner of cyber crimes are constantly evolving, with ever-evolving technology. The psychological impact that cybercrimes can have on the safety experience by women in digital spaces can be severe and can hamper their mental wellbeing.

B. BACKGROUND AND EVOLUTION

1. Internet was introduced in India around 1986, marking the beginning of a new digital era. However, the rapid adoption of digital technology and internet usage soon highlighted the need for a legal framework to govern activities in cyberspace.
2. It is in this backdrop that the Government of India, inspired by UNCITRAL model law, aimed to devise a new legislation that could cover and give legal recognition to e-commerce, make electronic records admissible in courts, and update other existing laws to accommodate electronic transactions.
3. On May 17, 2000, India's Parliament passed its first comprehensive cyber law, the Information Technology Act, 2000 (IT Act, 2000). After receiving the President's assent on June 9, 2000, the law was implemented on October 17, 2000.
4. The Information Technology Act, 2000 was India's first comprehensive law governing cybercrimes, electronic transactions, and online communication. This legislation provided legal recognition to electronic contracts, records, and signatures, and criminalized various forms of cybercrime such as hacking and data breaches.
5. Despite its progressive nature, the IT Act, 2000 had several loopholes and procedural challenges. The Act has undergone amendments, notably in 2008, to adapt to the evolving challenges of the internet era. The 2008 amendment significantly expanded the scope of the IT Act to address emerging cyber threats, including cyber terrorism, phishing, identity theft, and, most notably, crimes that violate the safety and dignity of women in online spaces. This amendment introduced stricter penalties and new provisions to tackle cyber stalking, voyeurism, the transmission of sexually explicit material, and the non-consensual distribution of private images. These changes empowered law enforcement agencies with more robust legal tools to combat digital crimes that disproportionately affect women.

6. Several key sections of the amended IT Act play a crucial role in protecting women from cyber exploitation. Section 66E penalizes the unauthorized capture, publication, or transmission of private images without consent, a provision particularly relevant to cases of revenge pornography and leaked personal content. Section 67 criminalizes the publication or transmission of obscene material in electronic form, addressing the growing issue of cyber pornography. Section 67A further strengthens these protections by specifically dealing with the transmission of sexually explicit content, which is critical in cases involving deepfake technology and other forms of digital abuse. Section 66C deals with identity theft, which is frequently used to create fake profiles or impersonate individuals to deceive

B. BACKGROUND AND EVOLUTION

1. Internet was introduced in India around 1986, marking the beginning of a new digital era. However, the rapid adoption of digital technology and internet usage soon highlighted the need for a legal framework to govern activities in cyberspace.
2. It is in this backdrop that the Government of India, inspired by UNCITRAL model law, aimed to devise a new legislation that could cover and give legal recognition to e-commerce, make electronic records admissible in courts, and update other existing laws to accommodate electronic transactions.
3. On May 17, 2000, India's Parliament passed its first comprehensive cyber law, the Information Technology Act, 2000 (IT Act, 2000). After receiving the President's assent on June 9, 2000, the law was implemented on October 17, 2000.
4. The Information Technology Act, 2000 was India's first comprehensive law governing cybercrimes, electronic transactions, and online communication. This legislation provided legal recognition to electronic contracts, records, and signatures, and criminalized various forms of cybercrime such as hacking and data breaches.
5. Despite its progressive nature, the IT Act, 2000 had several loopholes and procedural challenges. The Act has undergone amendments, notably in 2008, to adapt to the evolving challenges of the internet era. The 2008 amendment significantly expanded the scope of the IT Act to address emerging cyber threats, including cyber terrorism, phishing, identity theft, and, most notably, crimes that violate the safety and dignity of women in online spaces. This amendment introduced stricter penalties and new provisions to tackle cyber stalking, voyeurism, the transmission of sexually explicit material, and the non-consensual distribution of private images. These changes empowered law enforcement agencies with more robust legal tools to combat digital crimes that disproportionately affect women.

6. Several key sections of the amended IT Act play a crucial role in protecting women from cyber exploitation. Section 66E penalizes the unauthorized capture, publication, or transmission of private images without consent, a provision particularly relevant to cases of revenge pornography and leaked personal content. Section 67 criminalizes the publication or transmission of obscene material in electronic form, addressing the growing issue of cyber pornography. Section 67A further strengthens these protections by specifically dealing with the transmission of sexually explicit content, which is critical in cases involving deepfake technology and other forms of digital abuse. Section 66C deals with identity theft, which is frequently used to create fake profiles or impersonate individuals to deceive or harass women. Section 66D addresses online frauds involving impersonation, ensuring legal recourse for victims of deceitful cyber activities. Section 72 penalizes the breach of confidentiality and privacy, thereby safeguarding women's personal information from unauthorized disclosure or misuse.

7. The IT Act, 2000 and its subsequent amendments, along with the Bhartiya Nyaya Sanhita, 2023 Bhartiya Nagarik Suraksha Sanhita, 2023 and Bhartiya Sakshya Adhiniyam 2023 govern cyber law in India, providing a robust legal framework to protect digital rights and regulate activities in cyberspace.

8. Further, The Indecent Representation of Women (Prohibition) Act, 1986 regulates and prohibits the indecent representation of women through the media of advertisements, publications etc.

B. TYPES OF CYBER CRIMES AND LEGAL RECOURSES

i. Cyber Stalking :

Cyber stalking is the act of using the internet, social media, email, messaging apps, or other digital means to repeatedly harass, monitor, or intimidate someone. It often involves behaviours like:

- Constantly sending unwanted messages (even after being told to stop)
- Tracking someone's online activities (like checking their posts, comments, and location check-ins)
- Creating fake profiles to contact or impersonate the victim
- Threatening or blackmailing someone using personal information or private images

ii. Online Harassment :

Online harassment refers to persistent and aggressive behavior aimed at an individual or group through the internet. It can include:

- Sending threatening, abusive, or offensive messages
- Doxxing (publicly sharing someone's personal information without consent)
- Trolling (posting inflammatory comments to provoke or upset someone)
- Impersonation (creating fake accounts to defame or manipulate)
- Sexual harassment (sending explicit content or making unwanted advances)

ii. Cyberbullying :

Cyber bullying is a specific type of online harassment that primarily targets children, teenagers, and young adults. It means bullying inflicted through electronic means and may include:

- Spreading rumors, lies, or personal information to embarrass someone
- Sharing edited photos or videos to humiliate or mock
- Repeated insults, name-calling, or threats

Depending upon the type of harassment committed, relevant sections of the Information Technology Act will be applicable. (Kindly refer Table A)

i. Cyber Grooming

Cyber Grooming is the act of using the internet to build a relationship with someone with the intent of luring and harassing them to perform some acts. These acts are often sexual in nature.

ii. Cyber Voyeurism

Cyber Voyeurism is like having an invisible intruder sneak into your private digital spaces—without you knowing. Imagine someone hacking your phone, laptop, or webcam to watch you in your most private moments. Or someone secretly accessing and sharing intimate pictures or videos you never intended for public eyes.

It's not just about watching; it's about invading your sense of privacy, even when you're in your own home.

Section 66E of the IT Act, 2000 lays down the punishment for violation of privacy. It states that whoever, intentionally or knowingly captures, publishes or transmits the image of a private area of any person without his or her consent, under circumstances violating the privacy of that person, shall be punished with imprisonment which may extend to three years or with fine not exceeding two lakh rupees, or both.

iii. Cyber Sexual Harassment

Cyber sexual is considered as a form of sexual harassment which occurs through digital communication, including emails, text messages, social media platforms, and online forum.

Cyber sexual harassment refers to the harmful conduct perpetrated by one or more individuals against a victim in the cyberspace, resulting in various forms of harm, such as emotional and mental distress, gender-based harassment, privacy invasion, and more

iv. Identity Theft

When someone fraudulently or dishonestly makes use of the electronic signature, password or any other unique identification feature of any woman commits identity theft.

How It Happens:

- a. Creating fake social media profiles: Using a woman's photos to impersonate her, often for fraud, defamation, or to harass her contacts.
- b. Using personal details for financial fraud: Misusing Aadhaar numbers, PAN cards, or banking information for scams or unauthorized transactions.
- c. Misusing identity for harassment: Contacting others while pretending to be the victim to tarnish her reputation or cause distress.

Section 66C of the IT Act, 2000 prescribes the punishment for identity theft. The section lays down that whoever fraudulently or dishonestly makes use of the electronic signature, password or any other unique identification feature of any person, shall be punished with imprisonment of either description for a term which may extend to three years and shall also be liable to fine which may extend to one lakh rupees.

TABLE A- Types of Cyber Crimes and Relevant Sections

Sr. No	Type of Crime	Relevant Section
1.	Cyber Stalking 	Section 78 and 79 of the BNS, 2023 and Section 67 under I.T Amendment Act 2008. <i>Explained:</i> Section 78 BNS defines Stalking : This section defines stalking to include: 1. Following a woman and attempting to contact her repeatedly despite clear indications of disinterest. 2. Monitoring a woman's use of the internet, email, or any other form of electronic communication Section 79 BNS: Word, gesture or act intended to outrage the modesty of a woman. <i>Punishment:</i> Simple imprisonment for a term which may extend up to 3 years with fine. Section 67 IT Act: Prohibits publishing or transmitting obscene material in electronic form. <i>Punishment:</i> On first conviction with imprisonment of either description for a term which may extend to three years and with fine which may extend to five lakh rupees. In case of second or subsequent conviction with imprisonment of either description for a term which may extend to five years and also with fine which may extend to ten lakh rupees.

Section 336(4)BNS: lays down the provision for forgery for the purpose of harming reputation. Section 66D IT Act prescribes the punishment for cheating by personation Section 67A, IT Act prescribes the punishment for publishing or transmitting of material containing sexually explicit act, etc., in electronic form. Section 66E IT Act prescribes Punishment for violation of privacy. Further, Section 4 of the Indecent Representation of Women Act, 1986 may also be applicable.

B. REDRESSAL MECHANISM

B. National Cyber Crime Reporting Portal

The Ministry of Home Affairs has launched the Cyber Crime Reporting Portal to facilitate the reporting of cyber offenses.

Website: www.cybercrime.gov.in

Steps to file a complaint:

- a. Visit the portal and click on "File a Complaint."
- b. Select the category of the complaint (e.g., women/child-related crimes or other crimes).
- c. Provide necessary information, including your contact details, nature of the crime, and any evidence (screenshots, emails, chats).
- d. Submit the complaint and note the complaint reference number for future follow-up.

B. Cyber Crime Helpline: A 24x7 Cyber Crime Helpline (1930) has been launched to help individuals report financial cyber fraud. Victims can call the helpline to freeze transactions and prevent further loss.

For crimes related to women or children (e.g., harassment, blackmail, abuse), reports can be made anonymously through the Cyber Crime Portal. The government ensures confidentiality and sensitivity in handling such cases.

- ii. Victims can also lodge a First Information Report (FIR) at the nearest police station or approach the local Cyber Crime Police Station if available.
- iii. Complaint can also be made to the National Commission for Women for cybercrimes against women at ncw.nic.in or sent through post.

NCW Women Helpline Number - 7827170170

B. DO'S AND DON'TS LIST

DO'S

1. Enable a Firewall: Ensure your firewall is active to block unauthorized access to your system.
2. Use Antivirus Software: Install and regularly update a reputable antivirus program.
3. Use Antimalware Software: Use specialized antimalware programs to protect against advanced threats.
4. Use Strong Passwords: Create strong passwords with alphabets, digits, special characters and change them frequently to enhance account security
5. Clear Cookies and Cache: Regularly clear your browser's cookies and cache to protect privacy and improve system performance.
6. Verify Before You Click: Verify the source of emails, pop-ups, and unfamiliar links before clicking.
7. Report Cyber Threats: Immediately report instances of blackmail, abuse, or suspicious activities to the relevant authorities.
8. Avoid Unsecure Websites: Only visit websites that have "https" in the URL to ensure a secure connection.

DON'TS

1. Do Not Share Personal Information: Never share sensitive details such as your name, phone number, Aadhaar card details, bank information, or address on untrusted platforms.
2. Do Not Create Weak Passwords: Avoid using easy-to-guess passwords, and periodically change them to reduce vulnerability.
3. Do Not Share Personal Info on Social Media: Avoid oversharing private details on social media platforms.

NCW's Mandate

The NCW is tasked with:

- **Safeguarding Women's Rights:** Reviewing constitutional provisions and laws affecting women and recommending amendments.
- **Addressing Violations:** Investigating cases of rights deprivation and taking Suo-moto cognizance of violations.
- **Policy Recommendations:** Advising the government on policy measures for women's welfare and equality.
- **Awareness and Advocacy:** Conducting studies, research, and campaigns to address discrimination and advance women's empowerment.
- **Monitoring Institutions:** Inspecting jails, remand homes, and women's institutions to ensure safety and well-being.
- **Legal Support:** Funding litigation on critical issues affecting women.
- **Annual Reporting:** Submitting reports to the Central Government on women's welfare and rights.

The NCW continues to play a pivotal role in creating a society where women can live with dignity, free from discrimination and violence.

Ongoing Programs

Skill Development

- Programs on digital literacy, entrepreneurship, and vocational training for economic empowerment.

Legal Awareness Drives

- Collaborations with NGOs to provide free legal aid, counseling, and awareness sessions.

Aapke Dwaar Initiative

- State-level Jan Sunwai sessions to resolve women's grievances promptly.

Anti-Human Trafficking

- Preventive and rehabilitation programs for trafficking survivors in high-risk areas.

She is a Changemaker

- Leadership and mentorship programs to empower women in politics and administration

Research & Publications

- Studies on women's socio-economic issues and reports to influence policy changes.

Digital Shakti

- Cyber safety workshops to combat online harassment and empower women to thrive in the digital world

APPS FOR WOMEN SAFETY

Legal Guide App

This app is an initiative launched by the National Commission for Women (NCW) to provide women easy access to legal information and resources.

Shakti App

Shakti App, Launched by the Ministry of Women and Child Development in collaboration with NCW, is aimed at enhancing the safety of Women.

One Stop Centre App

This app provides information about the One Stop Centre (OSC) scheme, which is designed to assist women affected by violence.

112 App

This app provides a 24-hour emergency response system to enable users to get help from local volunteers.

Himmat App

If a user issues an SOS through the app, the location and audio-video is sent to the Delhi Police control room and friends or family are also alerted.

Raksha App

This app ensures the safety of women, with just a press of a button, your near and dear ones can know your location.

Cyber Harassment of Women

Inappropriate or Threatening Comments

Women often get insulted, told to commit suicide, or have their lives threatened online.

Cyberstalking

Women are at a high risk of being cyberstalked. People may use personal information to find them on other websites. For example, a man who has been rejected might harass the woman on another platform.

Doxxing

Women's personal information, such as phone number, full name, and address may be circulated online as a way to threaten or intimidate them. This often results in threats of violence — up to and including murder and rape.

Grooming

Women and young girls are especially at risk for grooming by older men. This is when someone gets close to someone else with the intention of exploiting them.

Catfishing

Women are more likely to fall victim to catfishing — when someone pretends to be someone they're not. Catfishers have many different motives, but one common motive is financial gain.

Inappropriate Use of Photos

Women not only receive unsolicited nude photos, they're also at risk to have their photos stolen and posted somewhere else. For example, someone may make an OnlyFans account using pictures they don't have permission to use or use those photos for revenge porn.

NCW's Vision of a Safe Cyber Space

As India continues to embrace the digital revolution, ensuring the safety of women in cyberspace remains a priority. The evolving nature of technology demands constant vigilance and legal adaptations to counter new threats effectively.

A safe cyber space is essential for ensuring that women feel comfortable to be online. A secure and resilient digital environment is created when individuals also play a critical role in ensuring their online safety.

By adopting cybersecurity best practices, being vigilant about online threats, and reporting cybercrimes promptly, we can collectively work towards building a resilient cyber space that safeguards privacy, promotes trust, and empowers digital growth.
